

# When facing the inconceivable...

**H**aving a family should be simple, but the fact is many couples who try to conceive are challenged by months and even years of disappointment. Having fertility issues may not mean they are infertile. There are usually complexities which involve more than one issue...complexities that require reproductive medical expertise.

Adult & Pediatric Urology is pleased to announce that Dr. Randle S. Corfman, Ph.D., M.D., Medical Director of The Midwest Center for Reproductive Health, P.A., will soon see patients at our Sartell clinic. The Midwest Center for Reproductive Health is one of the nation's leading fertility clinics, providing a range of options from basic diagnosis and treatment to the most advanced technology available. Their success rate is among the highest in the nation.

Dr. Corfman brings vast clinical knowledge and expertise with a caring approach. He treats patients like family and believes the greatest chance of pregnancy occurs when clinical excellence is combined with a focus on the patient.

**Dr. Randle S. Corfman, Ph.D., M.D.**  
*Fertility Specialist*

If you and your partner would like to explore fertility options, call The Midwest Center for Reproductive Health at (800)508-9763 and ask to make an appointment for an initial consultation at the Sartell Office of Adult & Pediatric Urology. Even after one visit, you will leave with questions answered and an individualized treatment plan.
